

Truong Son Nguyen

Senior Full-stack Developer | AI Engineer | Cloud Architect

📍 Ho Chi Minh City, Vietnam | 📞 0909691776 | ✉ sonnguyentruong87@gmail.com [LinkedIn](#) | [GitHub](#)

Professional Summary

Senior Full-stack Developer and AI Engineer with over 14 years of experience delivering scalable platforms across .NET, Python, and Node.js. A proven leader in modernizing legacy systems, driving agile engineering practices, and deploying cloud-native architectures on Azure, AWS, and GCP. Deeply experienced in both building robust backend APIs and crafting responsive SPA frontends (React/Next.js). Exceptionally strong foundation in SQL, CI/CD pipelines, and automated testing cultures. Passionate about leveraging cutting-edge Generative AI and LLM technologies to accelerate delivery and engineer state-of-the-art intelligent systems. Certified Azure AI Engineer.

Top Skills

Languages & Frameworks: Python, TypeScript, JavaScript, C#, React, Next.js, FastAPI, Django, Node.js, Express, .NET 6, ASP.NET Core, Blazor **AI & Machine Learning:** LangChain, LangGraph, LlamaIndex, OpenAI, Hugging Face, RAG pipelines, Prompt Engineering **Databases & Infrastructure:** PostgreSQL, SQL Server, MySQL, Cosmos DB, Pinecone, Qdrant, ChromaDB, Azure, AWS, GCP **Tools & Methodologies:** Docker, Apache Airflow, Kafka, RabbitMQ, CI/CD, Agile, SignalR

Certifications

- **Microsoft Certified:** Azure AI Engineer Associate
 - **Microsoft Certified:** Azure AI Fundamentals
 - **Artificial Intelligence on Microsoft Azure**
 - **Generative AI: Prompt Engineering Basics**
 - **AI Agents and Agentic AI with Python & Generative AI**
-

Professional Experience

Homework.ai

Senior Full-stack Developer | *August 2025 - Present* | *Ho Chi Minh City, Vietnam* - **Spearheaded the Architecture:** Architected and developed a state-of-the-art AI-powered Socratic tutoring platform using React, TypeScript, FastAPI, and PostgreSQL, resulting in a highly scalable and responsive learning environment. - **Advanced AI Integration:** Seamlessly integrated GPT-4 Vision to extract mathematical equations and handwriting via OCR, powering progressive hints and guided Socratic questioning. - **Engineered Real-Time Systems:** Designed a real-time tutoring WebSocket server and deployed a highly accurate Retrieval-Augmented Generation (RAG) pipeline, utilizing Pinecone and Apache Airflow to ground AI responses strictly in approved curricula.

Open Source (linkedin-cv-updater)

Creator & Software Engineer | *May 2026 - Present* - **Innovative Tooling Creation:** Engineered `linkedin-cv-updater`, an open-source FastMCP server integrating AI agents with LinkedIn to completely automate professional profile updates. - **Security & Automation:** Architected a robust CDP (Chrome DevTools Protocol) automation solution leveraging Playwright to securely bypass API rate limits and CAPTCHAs via local browser interactions. - **Global Distribution:** Packaged and distributed the solution globally using GitHub Actions and pre-compiled wheel binaries, leveraging Python 3.10+ and Pydantic.

AI Engineering & Personal Projects

AI Engineer | *April 2026 - Present* | *Ho Chi Minh City, Vietnam* - **LingoSafe Tutor:** Architected a secure, AI-powered language learning assistant using LangChain/LangGraph. Implemented advanced guardrails, including PII sanitization and a Llama-Guard Jailbreak Classifier, to ensure child safety and block adversarial inputs. - **my-coding-agent:** Engineered a background Python orchestrator that intelligently routes GitHub repository tasks based on Trello ticket creation using OpenAI models, drastically streamlining developer operations. - **Curriculum Plan RAG Project:** Developed a multilingual RAG pipeline for curriculum documents with OCR-aware ingestion using LlamaIndex, Qdrant, and Hugging Face embeddings. Automated scalable data workflows via Apache Airflow and Azure Blob storage.

Audiostamps

Full Stack Developer | *June 2025 - Present* | *Ho Chi Minh City, Vietnam* - **E-Commerce Innovation:** Architected a full-stack platform allowing users to bridge physical objects and digital memories via QR-code stickers, recording and playing voice messages in-browser. - **Robust Payment Processing:** Engineered a secure, high-throughput fulfillment pipeline integrating PayPal checkout and automated IPN webhooks. - **Asynchronous Processing Architecture:** Built a highly reliable background worker system using Bull and Redis for asynchronous dynamic PDF generation, audio conversion, and email notifications.

Vactors

Senior Frontend Developer | *January 2025 - Present* | *Ho Chi Minh City, Vietnam* - **High-Performance Frontends:** Led the front-end architecture for a collaborative voice-reading platform utilizing Next.js 14, React 18, and TypeScript, resulting in optimized SEO and seamless performance. - **Advanced State Management:** Implemented robust server-state management using React Query, ensuring smooth audio playback, dynamic user interfaces with MUI, and accessible schema-validated forms.

KMS Technology, Inc.

Senior Software Engineer & Technical Lead | *July 2018 - Present* | *Ho Chi Minh City, Vietnam* - Led 3-dev squads on high-impact cloud applications, mentored junior developers, and drove significant architectural migrations to modern frameworks like .NET 6, Blazor, and React.

TIKI Corporation

Senior Software Engineer | *September 2016 - July 2018* | *Ho Chi Minh City, Vietnam* - **E-Commerce At Scale:** Drove development within the E-Commerce platform handling Order Fulfillment, Inventory Synchronization, and Promotions. - **Systems Integration:** Built high-throughput integrations using Kafka, RabbitMQ, and Odoo ERP, dramatically improving system reliability and operational efficiency.

NashTech Limited

Back End Developer | *September 2014 - September 2016* | *Ho Chi Minh City, Vietnam* - Engineered a highly secure Gift Card Management System utilizing Python/Django and MySQL, empowering US customers to manage gift card loading while strictly maintaining retailer financial control.

EyePower Games Pte Ltd

Senior Software Engineer | *July 2012 - September 2015* | *Ho Chi Minh City, Vietnam* - Developed immersive, interactive educational portals and games (Moo-O, NewsMaker, Tandem) leveraging Python, Django, React, and .NET. Innovated with webcam and microphone integrations to instantly transform children into story characters.

Gold Start Soft

Developer | *September 2009 - July 2012* | *Ho Chi Minh City, Vietnam* - Engineered custom business portfolio websites using .NET and ASP.NET MVC, gathering requirements directly from clients and ensuring maximum business impact.
